

## *Erasmus Vox Pop*

It's the best opportunity to know other cultures, to meet new people, to develop your self confidence and to develop new skills to make experience, yeah.

I think it's nice to see other countries, and it's a good, it's a good possibility to do that and we think it is also experience for life.

Before starting to study I wanted to live in another country for a while so that my French would get better and that I could speak fluently because I started learning French in school.

Erasmus Plus is like a window. You open the window and you can go everywhere. You can do many things.

Until now it is a very great experience and I've met a lot of new people. Not only French people but also from lots of different countries so I think it's a really great experience.

It's a thing that I think if you don't experience this in your life you lose, you lose a lot of things. Like it changes your life, it opens your horizons. It's great.

I would say it's great because everybody can do it, not only a certain group of people but everybody can apply and everybody can go wherever you want to go so I think it's great.

A year before I could never imagine that I would be here right now, and doing this. It's great for every student and I suggest it to everyone. They have to try even if they are afraid of anything. They have to do it. It's going to be great.
